Eligibility
- Applicant must be a resident or landowner in the District
- Rebates are issued to the property owner or tenant only
- Participation is limited to once every 12 months
- Rebates are available for new systems or existing systems expanding storage capacity
- Purchases must have been made on or after June 1, 2015 to qualify for the rebate

Program Information
Panhandle Groundwater Conservation District (PGCD) offers a financial incentive to encourage rainwater harvesting for non-potable uses. Rebates of $0.50 per gallon of storage capacity are available for all rainwater harvesting systems not to exceed 50% of total system cost. Steps for participation vary based on storage capacity installed. New systems rebates will take priority over system additions. Please see below for application instructions.

System Requirements
- Tanks 1500 gallons and larger require the installation of a first-flush diversion system and a sturdy, level based constructed or gravel, sand or concrete. Wooden, above ground platforms are not permitted for large cisterns.
- Transparent or translucent collection tanks and piping must be painted or enclosed to prevent penetration from sunlight (a black colored tank is recommended).
- Participants in this program will be required to give a yearly estimate of gallons of water collected with system.

Rebate Amount
- $0.50 per gallon of storage capacity for all systems not to exceed 50% of system cost.
- Total maximum rebate amount is $1,000.00 per site. If rebate exceeds $1,000.00 it will go before the PGCD Board for approval.
- Rebate covers materials and labor for dedicated system components including tank, pad, screens, filters, first-flush, selected piping installation, and gutters.

Application Instructions
**Less than 1,500 Gallons**
1. Purchase and install rain barrels.
2. Submit application and receipts within 30 days of purchase.
3. PGCD staff may schedule and conduct a system inspection to verify installation prior to issuing rebate.
4. Pictures of system must be included with application submission for proof of installation.

**1,500 gallons or more**
1. Prior to purchase, submit application and plan for review.
2. PGCD will notify applicant of approval status and availability of funds.
3. Purchase and install system.
4. Submit receipts and rebate calculation worksheet within 90 days of conditional approval.
5. PGCD staff will schedule and conduct a system inspection to verify installation prior to issuing rebate.
Eligibility
◇ Applicant must be a resident or landowner in the District
◇ Rebates are issued to the property owner or tenant
◇ Participation is limited to once every 12 months
◇ Rebates are available for new systems or existing systems adding storage capacity
◇ Purchases must have been made on or after June 1, 2015 to qualify for the rebate

Total new storage capacity __________________________ Is pump included? ____________

Customer Agreement
I certify that the information I have supplied in the application is accurate and that I have read and understand the program guidelines. I understand PGCD does not assume liability for rebated products or services and that rebate application consideration or rebate receipt does not take the place of any required permits or inspections. I agree to: make a good faith effort to keep my rainwater harvesting system functional for at least five years and larger rainwater collection systems for 10 years; install and maintain required backflow prevention if the system is pressurized; not use collected rainwater for potable use; and allow PGCD to reference viewings or promotional tours of rainwater harvesting systems. I understand that PGCD reserves the right to cancel or modify the program without notice and that rebates are subject to funding availability.
